DAMAVAND[®]

Disposable Laryngoscope Blade (LED-HQ)

Our standard single-use laryngoscope blades offer a reliable solution to help reduce the risk of cross-contamination without sacrificing quality and affordability. DAMAVAND® Single-Use Laryngoscope Blades offer the opportunity to reduce the risk of infection associated with reusable devices by delivering a new surface every time. These single-use blades eliminate the hidden costs of reusable blades, including the labor and materials associated with reprocessing. Standard blades, such as the DAMAVAND® Single-Use Laryngoscope Blade, provide bright, clear LED light with the quality clinicians rely on.

- Material: PVC
- Feature: Disposable
- Certification: ISO13485:2016
- Ethylene Oxide
- Sterilization: Ethylene Oxide Sterilization
- Application: Hospital
- Group: Adult, Pediatric, Neonatal
